

Innovative Solutions For The Greener Good

Terra Novo™

Edge™

No Water? No Problem.

Pellet Form of Top Rated EarthGuard® Fiber Matrix:

Now you've got the edge. We make airtime cost effective. Especially when time, distance and water availability conspire against you. Also great for manual application on smaller sites when hydraulic application isn't cost effective.

Erosion Control For Sites For Limited Access and/or Low Water Availability:

- Apply Manually - precise application control for small and remote coverage areas
- Apply Mechanically - for larger coverage in remote areas with no access to water
- Apply Aerially - fast and cost effective for limited water access areas including remote sites of any size
- Formulated to completely expand within 1 minute in the presence of rain
- Same great EarthGuard chemistry without the water delivery costs

EarthGuard Edge is applied in its dry, pellet form. When the site receives its first rainfall, the pellets dissolve, spreading both the fiber and the EarthGuard soil stabilizer.

MADE IN

Innovative Solutions For The Greener Good

Edge™

Smart Applications for
Remote Sites
Of Any Size -
Without
Hydromulching

Effective For:

Slope Stabilization

Landscape Design

Reclamation

Storm Water
Runoff Protection

Fire/Burn Rehabilitation

Land Development

Construction

Utilities

Pipelines
