

SoilMAX

SOIL STABILIZATION
AND CONDITIONING

SoilMAX:

- Stabilizes farm, turf and nursery soil structures
- Boosts profits by increasing water infiltration
- Keeps the soil soft, resulting in reduced labor and equipment costs typically required for ground preparation
- Substantially reduces time and labor spent on disc or field ripping
- Increases yields & decreases amount of dirt sticking to root crops during harvest

Effective For:

- Soil stabilization
- Soil conditioning
- Crop growth
- Saving water consumption

Also consider **Agriflo**, which can be easily mixed with fertilizers, sprayed directly on seed beds or applied during irrigation to prevent crusting and improve germination.

Designed for soil stabilization in agricultural production, SoilMAX is used for growing crops with less water and easy compliance with the Clean Water Act. SoilMax performs the following:

- Keeps soil soft and conditioned
- Stops the formation of a crust
- Reduces the amount of water needed for irrigation
- Stops field erosion
- Keeps pesticides, fertilizers and nutrients from running off

Because it works directly on the soil, SoilMAX reduces costs and maintains aggregate stability and porosity so that water and nutrients go directly to the root zone rather than running off.

SoilMAX products launched in 1998 and have recently exploded in popularity as a result of increased regulatory requirements, including mandatory reduction of irrigation water and the monitoring of chemicals in field runoff. Terra Novo currently provides four different additives:

SoilMAX, SoilMAX Plus, SoilMAX Liquid and SoilMAX Plus Liquid.

SoilMAX and SoilMAX Plus can be worked into the soil before the first irrigation, while SoilMAX Liquid and SoilMAX Plus Liquid are ideal for use in sprinklers and low-flow irrigation systems.

Highly Effective. Cost Efficient.

Terra Novo Manufactures

Erosion Control:

- EarthGuard®
- EarthGuard Fiber Matrix
- EarthGuard **EDGE™**

Reclamation:

- EarthGuard **FUSION™**
- EarthGuard **ORGANIX™**
- EarthGuard **ELIXIR™**

Agricultural Soil Stabilization and Conditioning

- SoilMAX
- Agriflo

Dust Suppression

- DustCap
- DustControl DG

Water Clarification

- AquaGuard

Terra Novo's engineers and chemists pride themselves on maintaining a hands-on approach to solving site-specific problems for the agriculture, reclamation and erosion-control industries with highly effective, extremely affordable and environmentally friendly product lines developed to comply with the Clean Water Act and pass acute and chronic toxicity studies.

Terra Novo products are:

- Distributed in all 50 states and Canada
- Exported internationally
- University-tested
- Worksite-proven
- Highly cost-effective
